What families & clinicians say

“

My husband came home from hospital with a wound vac and instructions I couldn't follow. Joan arrived the next morning, got everything set up, and showed us exactly what to watch for. When a small infection started, she caught it before it became an emergency. We didn't go back to hospital. I don't know what we would have done without her.

— Margaret, South Surrey

“

Mom's medication list changed three times during her hospital stay. I was terrified I'd mix something up. Joan did a full medication reconciliation on her first visit — laid out every pill, explained every dose, and coordinated directly with our pharmacist. That kind of clinical precision gave our whole family room to breathe.

— Raj, Langley

“

After my fall, I couldn't manage the stairs or cook for myself. Nashoba sent someone who helped me shower, made my meals, and never once made me feel like a burden. I'm still in my own home because of them.

— Evelyn, Burnaby

How Referral Works

1. Call (778) 837-6727 or email referral@nashobahomecare.ca with patient details
2. Rapid in home or virtual assessment scheduled quickly
3. Custom care plan aligned with discharge instructions
4. Matched caregiver or nurse begins care
5. Ongoing updates to family and care team
